MEGA-FLO® | FILTRATION SYSTEM

Disc System to 14,000 GPH

**Stainless Steel
External Hardware**

Non-Metallic Solution Contact

High-temp PP or CPVC
(Chemical resistance guide on T-102)

Disc Systems

40 Gal. slurry tank w/ valves

Motor Starter

NEMA 4X watertight w/
overload protection.

High Flow Rates

6,000 - 30,000 GPH @ 60Hz

Chemical Duty Motor

230/460V/3/60Hz TEFC
Sealed oversized bearings,
cast iron end bells, corrosion
resistant epoxy coating,
stainless steel nameplate.

Flange Connections

EPDM Elastomers

Centrifugal Pumps

Double mechanical seal,
or magnetic-coupled.

Cartridge System to 21,000 GPH

Carbon Purification Chambers:

CPVC chambers have PVC canisters.

PP chambers have PP canisters.

Chambers include flow control valve, EPDM elastomers, and all piping.
